

ON-SITE ALPHA DIESET REBUILD PROGRAM

QUICK TURN AROUND • HIGH QUALITY • SINGLE or DOUBLE CUT

The dieset is the heart of the **Alpha Cutoff Press**. Its condition dictates the overall reliability of the cut off as well as the quality of the cut. To keep your dieset in precision alignment, schedule a certified Thermatool dieset technician to rebuild your dieset in your plant.

Rely on the company that designs and builds diesets to inspect and refurbish them at your facility. You schedule an appointment, we report to your plant, we complete the **dieset rebuild** and provide you with all the information in a detailed report.

Contact our **Spare Parts Department** for further information and pricing at Thermatool Corp.
