

HAZControl Technology

re-defining the HF Welding Process

Thermatool Solid State HF welders are unique, able to provide precise independent control of weld power and frequency. This proven technology is enhanced by the **NEW HAZControl Technology**, a control platform designed to benefit operators by:

- Making it easier to achieve the best weld using different combinations of weld power and weld frequency, on each and every mill run.
- Storing product process parameters for quick, easy, automatic operation on future mill runs.
- Enhancing operator skills and reducing process variability and costly scrap.
- Consistently delivering the highest weld quality.
- Includes new Vee Axis™ Control.
- Better control of the I.D. bead.

For the most reliable return on your investment, turn to Thermatool.
